

## West Sacramento Girls Softball Air Quality Policy

All WSGS practices and games are to be suspended if the Air Quality Index (AQI) for West Sacramento is at or above, or forecasted to be at or above, an AQI score of 150, which is the "Unhealthy" threshold for the U.S. Environmental Protection Agency. The WSGS President or their designee will assess the AQI and alert Head Coaches if games or practices are to be suspended.

For weekday evening practices or games, the AQI will be assessed after Noon on the day of the practices or games. Coaches will be notified no later than 4:00 PM if practices or games are to be suspended.

For weekend practices or games, the AQI will be assessed within 90 minutes to 2 hours of start time on the day of the practices or games. Coaches will be notified no later than 90 minutes prior to start of practice or game time if practices or games are to be suspended.

*This Policy was approved by the West Sacramento Girls Softball Board of Directors on August 23, 2021.*
